Masahiko Ochiai Showa University Northern Yokohama Hospital

Takayuki Ogawa The Jikei University

Makoto Sekiguchi Fukaya Red Cross Hospital

Web  
開催

## Greetings

We would like to report to you that TOPIC 2021, which was held in a web-based format after two years' absence, attracted a total of approximately 1,500 participants with over 10,000 accesses and finished as a success. We give our utmost thanks for your dedication to our program.

Furthermore, we would like to inform you that we revised the operational organization to enhance the contents of TOPIC 2022. In addition to the four Course Directors responsible for programs in general, Dr. Takayuki Ogawa and Dr. Makoto Sekiguchi joined to continue with the change in generations. We are also brushing up the coronary, peripheral, and structure areas with the doctors who help us develop the program as Executive Course Directors.

Although the prevalence of COVID-19 is settling down to some extent after the 5th wave in summer in Japan, the world's COVID-19 pandemic has not been stamped out yet. Considering the situation, where clear guidelines for the organization and operation of face-to-face live demonstrations have not yet been issued from the Government or Societies, we have decided to hold TOPIC 2022 in a web-based format, the same as last year. In light of our experience with TOPIC 2021, we plan to hold TOPIC 2022 over 3 days, from July 7 to July 9, JST. In addition to live demonstrations, we will increase the variety of programs, aiming for a more active and educational conference to make TOPIC 2022 as similar as possible to those before the COVID-19 pandemic.

We really appreciate your cooperation and participation.

December 2021

TOKYO Percutaneous cardiovascular Intervention Conference
